STRAT-Board: EU supported Integrated Territorial and Urban Development Strategies 2014-2020

The 2014-2020 Cohesion Policy provides Member States with new opportunities to support sustainable urban development and other integrated territorial strategies. Emphasis is put on the integrated nature of these, tackling the main urban and territorial challenges in cross-cutting ways to increase the effectiveness and efficiency of individual actions.

**Launch: Spring 2018
(pre-release)**

**Official presentation:
Autumn 2018
(European Week of
Regions and Cities 2018)**

STRAT-Board

Territorial and Urban Strategies dashboard

- **STRAT-Board** is a joint JRC- REGIO project that aims to provide a continuously updated state of play on how ESIF support the integrated approach to urban and territorial development.
- Developed under the **Knowledge Centre for Territorial Policies**
 - Territorial knowledge base
 - Advance analytical and modelling capacities
 - **Dedicated platforms** to exchange information and capitalise on the wealth of existing but fragmented and not always easily accessible knowledge at all levels – local, national, European and global

STRAT-Board

Territorial and Urban Strategies dashboard

- *WHY*

ESI Funds 2014-2020 put great emphasis on the **urban dimension** and on the concept of **integrated approach to territorial and urban development**, but no detailed information on its implementation on the ground

- *WHAT*

Sustainable Urban Development (SUD) and Integrated Territorial Investment (ITI) strategies

- *HOW*

Data collection, data improvement and data analysis based on:

- ✓ **DG REGIO study "Integrated Territorial and Urban Strategies: how are ESIF adding value in 2014-2020?" (EPRC, 2017)**
- ✓ **Open Cohesion Data portal**
- ✓ **JRC survey addressing Managing Authorities in all MSs (started February 2018, ongoing)**

STRAT-Board

Territorial and Urban Strategies dashboard

- An interactive mapping platform that provides information on Sustainable Urban Development (SUD) and Integrated Territorial Investment (ITI) strategies currently implemented across Europe.
- Enables policy-makers and experts to explore different investment strategies by geographical unit and localisation, with territorial focus, thematic concentration, size of population, funding arrangements, implementation mechanisms and progress.
- Maps almost one thousand strategies in 28 EU countries.
- A unique knowledge base on the integrated approach to urban and territorial development.
